An Overview of SERU 2014 Results:

The Student Experience in the Research University (SERU) survey provides important feedback from students about their level of satisfaction, engagement, educational achievements, goals, and the perceptions of the academic and student life environment at participating AAU institutions including Rutgers Biomedical and Health Sciences (RBHS). It is important to recognize that SERU responses, like many large scale student surveys, are often viewed as indirect measures of student outcomes. However, these survey responses from students still provide important empirical information about how they view their student experience at Rutgers and its components (schools, majors, etc.); these responses can assist in the effort to improve the overall student environment of the university. Moreover, the SERU survey results provide an important assessment about how well Rutgers-RBHS is doing in improving one of the key critical priorities of the Rutgers-RBHS Strategic Plan: Transforming the Student Experience.

The following report includes pie charts that highlight specific information reported by students at your school, RBHS, as a whole, and other participating AAU institutions. The AAU institutions that participated in the 2014 administration were the Universities of California, Iowa, Michigan, Minnesota, Pittsburgh, Southern California, Virginia, Washington in addition to Indiana, Texas A&M, and Purdue Universities.

Scaled factor analyses were conducted to measure aggregate responses for a particular dimension. Quantiles of the complete set of respondents from all schools were examined to establish high, medium, and low reported levels within each dimension. A value equal or lower to the first quantile was labeled 'Low', a value equal or higher to the third quantile was labeled 'High', and all values between were labeled 'Medium'. There were a total of eight dimensions with a variety of items included in each one. In the interest of space, the number of items used in each dimension is listed along with some examples of items used. Please contact the Office of Institutional Research and Academic Planning for a complete list of items used in each dimension.

Dimension	Number of Items	Item examples
Satisfaction with educational experience	29	1) Quality of faculty instruction 2) Advising by faculty on academic matters 3) Are program requirements well defined?
Current skills self-assessment	14	1) Analytical and critical thinking skills 2) Ability to read and comprehend academic material
Engagement with studies	16	1) Interacted with faculty during lecture class sessions 2) Communicated with a faculty member by e-mail or in person
Gains in self-assessment of skills	14	1) Change in analytical and critical thinking skills 2) Understanding of a specific field of study
Development of scholarship	9	1) Examined how others gathered and interpreted data and assessed the soundness of their conclusions 2) Incorporated ideas or concepts from different courses when completing assignments
Campus climate for diversity	8	1) Students of my race/ethnicity are respected on this campus 2) Students of my gender are respected on this campus
Academic disengagement	12	1) Partying 2) Skipped class
Research activities	8	1) Assist faculty in research with course credit 2) At least one student research course (a course in which you learned research methods or researched a topic)

Finally, comparative breakout tables between an individual school and RBHS respondents across various aspects of student satisfaction, engagement, time allocation, and motivations for major selection by gender, ethnicity, enrollment status, and class level are reported. Breakouts by major were also reported for each individual school without the RBHS comparison.

This report was prepared by Victoria Porterfield at the Office of Institutional Research and Academic Planning. For any questions, please contact her directly at Porterfield@instlres.rutgers.edu.
